ABOUT ME:

Computer Science and Engineering student with knowledge of Java, Python, Data Structures, Algorithms, and Object-Oriented Programming. Experienced in developing recommendation systems, multithreaded applications, and educational platforms. Passionate about software development, problem-solving, and learning new technologies.

SKILLS:

- Java, Python, JavaScript
- Data Structures, Algorithms
- HTML, CSS, Git, GitHub
- OOP, Multithreading
- Problem Solving
- Object-Oriented Programming
- Software Development
- Version Control (Git)

INTERNSHIP:

Java Developer Intern - CODTECH

2024

Completed a Java development internship at CODTECH, gaining hands-on experience in Java programming, OOP concepts, and software development best practices. Worked on assigned modules and contributed to team tasks.

Applied core Java concepts including multithreading, collections, and exception handling

Developed and tested Java-based modules as part of internship deliverables

Projects

2023-2024

StudyWiki: Built an educational web platform providing accessible learning resources with interactive modules and quizzes. | Chaosos: Developed a content-based recommendation system using Python and machine learning with collaborative filtering.

Multithreaded Chat Application : Designed a Java multithreaded chat app with thread synchronization and concurrency control

Implemented thread pooling to optimize resource utilization; used Java concurrency APIs and best practices

Certifications

CERTIFICATIONS:

HackerRank Java (Basic) - HackerRank | Python (Basic) - HackerRank | Problem Solving (Basic) - HackerRank | Crash
Course on Python - Google/Coursera

Achievements: Completed multiple HackerRank certifications demonstrating proficiency in Java and Python

Active contributor on GitHub | Solved problems on HackerRank platform consistently
